Reviewer B:

Overall the article has been written very well. However, there are some things that can be improved by the author:

- The importance of research of the selected variable should be explained in the introduction, which may lead to the research gap
- Authors need to follow APA 6.0 or 7.0
- Need a proof-read
- Elaborate in more details regarding the results and give a thorough analysis
- Make sure to add limitations of the study, managerial implications, future directions.
- The paper should be between 5000-7000 words, whereas this paper was only 3300 words.
