Dean of Faculty of Computing

STATEMENT OF ORIGINALITY

In my capacity as an active student at President University and as the author of the final project stated below:

Name : Alexander Stefanus Axel Dion

Student ID number : 001201700018

Study Program : Informatics

Faculty : Computer Science

I hereby declare that my final project entitled “**ART COMMUNITY-DRIVEN MARKETPLACE BASED ON ANDROID APPLICATION - USING FLUTTER**” is to the best of my knowledge and belief, an original piece of work based on sound academic principles. If there is any plagiarism detected in this final project, I am willing to be personally responsible for the consequences of these acts of plagiarism and will accept the sanctions against these acts in accordance with the rules and policies of President University.

I also declare that this work, either in whole or in part, has not been submitted to another university to obtain a degree.

Stats

Average Perplexity Score: 5287.716

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 14621.259

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "*Name: Cutifa Safitri*", has a perplexity of: 75717

ABSTRACT

Social media and art has become relatively connected with each other over the past decades, by people posting a picture through social media almost everyday. An Android-based community marketplace transaction system using Android smartphone feature is take place to provide all artists around the world to ease their catalog and selling and recognize other artists.

The methodology used to develop the final project is Rapid Application Development (RAD). RAD methodology is used to minimize planning stage and maximize the prototype stage which can bring greater efficiency and faster development of the Android-based community marketplace transaction system.

This final project utilizing a real-time API to do transaction between artist, simple and yet user interface friendly to do both sell and buy an art. Its also enhance the experience on social media platform and interaction with other artists, which gain in rich application experience by improving a new method for the artist. Future work that can be improved to the application and the system by adding a chat feature between users and implementing an explicit content filter.

DEDICATION

*I would dedicate this project for my past, present and future self, along
with my parents.*

ACKNOWLEDGEMENT

Praise and gratitude for the Almighty God, Jesus Christ for His marvelous blessing upon the author to finish this final project. Together with other parties who supported and assisted the author during this final project. On this opportunity, I would like to express my gratitude to the following:

1. My parents and my family, who supported me during my university life
2. Ms. Cutifa Safitri, my final project advisor who supports, guides, provides advice and encourages me for completing this final project and study.
3. Mr. Nur Hadisukmana, my academic advisor who helped, guides, and provide solution during my hard time in the university life.
4. All lecturers and staff of the Faculty of Computing, who provide valuable knowledge and advice during my study at the university.
5. All my friends, Windy Anastasya, Jon Person, Haiqal Muhammad, Maulana Ikhsan, Dinda Azahrah and Monica Sances who always supported me and encourage me during my hard time to finish this final project and study.
6. To my only cat, Bobby who always accompany and bringing joy during the process of this final project.
