Approved:

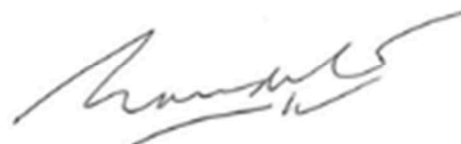

Final Project Advisor

Ronny Juwono, S.Pd., M.T.

Program Head Information Technology

Cutifa Safitri, Ph.D.

Dean of Faculty of Computing
Rila Mandala, Ph.D.

STATEMENT OF ORIGINALITY

In my capacity as an active student of President University and as the author of the thesis/final project/business plan (underline that applies) stated below:

Name : Mullah Cadre Giawa
Student ID number : 00120190011
Study Program : Information Technology
Faculty : Computing

I hereby declare that my thesis/final project/business plan entitled " Application of Collaborative Filtering Algorithms in Personalizing Product Recommendations in E-Commerce" is to the best of my knowledge and belief, an original piece of work based on sound academic principles. If there is any plagiarism detected in this thesis/final project/business plan, I am willing to be personally responsible for the consequences of these acts of plagiarism, and will accept the sanctions against these acts in accordance with the rules and policies of President University.

I also declare that this work, either in whole or in part, has not been submitted to another university to obtain a degree.

SCIENTIFIC PUBLICATION APPROVAL FOR ACADEMIC INTEREST

As an academic community member of the President's University, I, the undersigned:

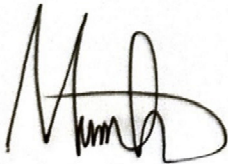

Name : Mullah Cadre Giawa
Student ID number : 00120190011
Study Program : Information Technology
Faculty : Computing

for the purpose of development of science and technology, certify, and approve to give President University a non-exclusive royalty-free right upon my final report with the title:

Application of Collaborative Filtering Algorithms in Personalizing Product
Recommendations in E-Commerce

With this non-exclusive royalty-free right, President University is entitled to converse, to convert, to manage in a database, to maintain, and to publish my final report. There are to be done with the obligation from President University to mention my name as the copyright owner of my final report. This statement I made in truth.

Mullah Cadre Giawa

ADVISOR APPROVAL FOR PUBLICATION

As an academic community member of the President's University, I, the undersigned:

Advisor Name : Ronny Juwono, S.Pd., M.T.

Employee ID number :

Study program : Information Technology

Faculty : Computer Science

declare that following thesis:

Title of thesis : Application of Collaborative Filtering Algorithms in Personalizing Product Recommendations in E-Commerce Thesis

author : Mullah Cadre Giawa

Student ID number : 001201900117

will be published in journal / institution's repository / proceeding / unpublish

/ (choose one, underline that applies)

ABSTRACT

The number of people using and transacting in e-commerce has skyrocketed in recent years. To help people locate items that are a good fit for them, the recommendation system becomes crucial. This research suggests that e-commerce recommendation systems use Collaborative Filtering methods. Collaborative filtering is a technique that makes suggestions based on the tastes of users who are similar to the one making the suggestion. Rapid Application Development (RAD) is the research approach used, and it consists of four phases: planning, design, development, and cutover. Metrics like as Mean Absolute Error, Root Mean Squared Error, and F-Score are used to assess and evaluate systems. Incorporating Collaborative Filtering methods into e-commerce recommendation systems improved both suggestion accuracy and user happiness. But there's still work to be done to fine-tune the algorithm and make the system flexible enough to accommodate evolving user preferences and habits.

Keywords: e-commerce, recommendation system, collaborative filtering, rapid application development, system evaluation.

GPT ZERO CHECK

Stats

Average Perplexity Score: 4974.894

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 24848.793

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "*Research Objective*", has a perplexity of: 155213

Stats

Average Perplexity Score: 4136.763

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 13395.098

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "*System Overview*", has a perplexity of: 103423

Stats

Average Perplexity Score: 2399.611

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 6909.835

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "*CHAPTER VII*", has a perplexity of: 25095

PANEL OF EXAMINER APPROVAL

The Panel of Examiners declare that the undergraduate thesis entitled **APPLICATION OF COLLABORATIVE FILTERING ALGORITHMS IN PERSONALIZING PRODUCT RECOMMENDATIONS IN E-COMMERCE** that was submitted by **MULLAH CADRE GIAWA** majoring in **Informatics** from the Faculty of Computer Science was assessed and approved to have passed the Oral Examination on Tuesday June 13, 2023.
