GPT ZERO CHECK RESULT

Stats

Average Perplexity Score: 100.057

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 103.660

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "The danger and uncertainty for investors have grown because to this new COVID-19 pandemic.", has a perplexity of: 601

ABSTRACT

This study aims to determine the effect of macroeconomic indicators on the stock prices of banking companies before and after the Covid 19 pandemic. To achieve this, researchers will conduct tests to determine the significance to the relationship between inflation, interest rates, economic growth, and exchange rate concerning stock prices in banking firms. Information collected from banking companies in Indonesia that is listed on the Indonesia Stock Exchange between 2018 and 2021. Purposive sampling used to collect information. As a result, a total of 240 data collected from 5 companies as samples. As a tool, the statistical analysis method with multiple regression analysis used to evaluate the hypothesis. The results showed that inflation has a significant effect, interest rate has no impact, and exchange rate has positive effect towards stock price rate of return.

Keywords: *Inflation, Interest rate, Exchange rate, Macroeconomics, Stock price.*

INTISARI

Tujuan dari penelitian ini adalah untuk mengetahui pengaruh indikator makroekonomi terhadap harga saham perusahaan perbankan sebelum dan sesudah pandemi Covid 19. Untuk mencapainya, peneliti akan melakukan pengujian untuk menentukan signifikansi hubungan antara inflasi, suku bunga, pertumbuhan ekonomi, dan uang beredar dalam kaitannya dengan harga saham perusahaan. Informasi dikumpulkan dari perusahaan perbankan di Indonesia yang termasuk dalam Bursa Efek Indonesia antara 2018 sampai 2021. Pengambilan sampel purposive digunakan untuk mengumpulkan informasi. Sebanyak 240 data dikumpulkan dari 5 perusahaan sebagai sampel. Sebagai alat, metode analisis statistik dengan analisis regresi berganda digunakan untuk mengevaluasi hipotesis. Hasil penelitian menunjukkan bahwa Hasil penelitian menunjukkan bahwa inflasi berpengaruh signifikan, suku bunga tidak berpengaruh, dan nilai tukar berpengaruh positif terhadap tingkat pengembalian harga saham.

Kata kunci: *Inflation, Interest rate, Exchange rate, Macroeconomics, Stock price.*
