## **ACKNOWLEDGEMENT**

First and foremost, the author wants to express her deepest gratitude, to Almighty God, for the wondrous and marvelous grace of Jesus Christ that the author finally completed this thesis. This thesis is intended to fulfill one of the requirements for the Master's degree at President University. The author also expresses her gratitude to the following people:

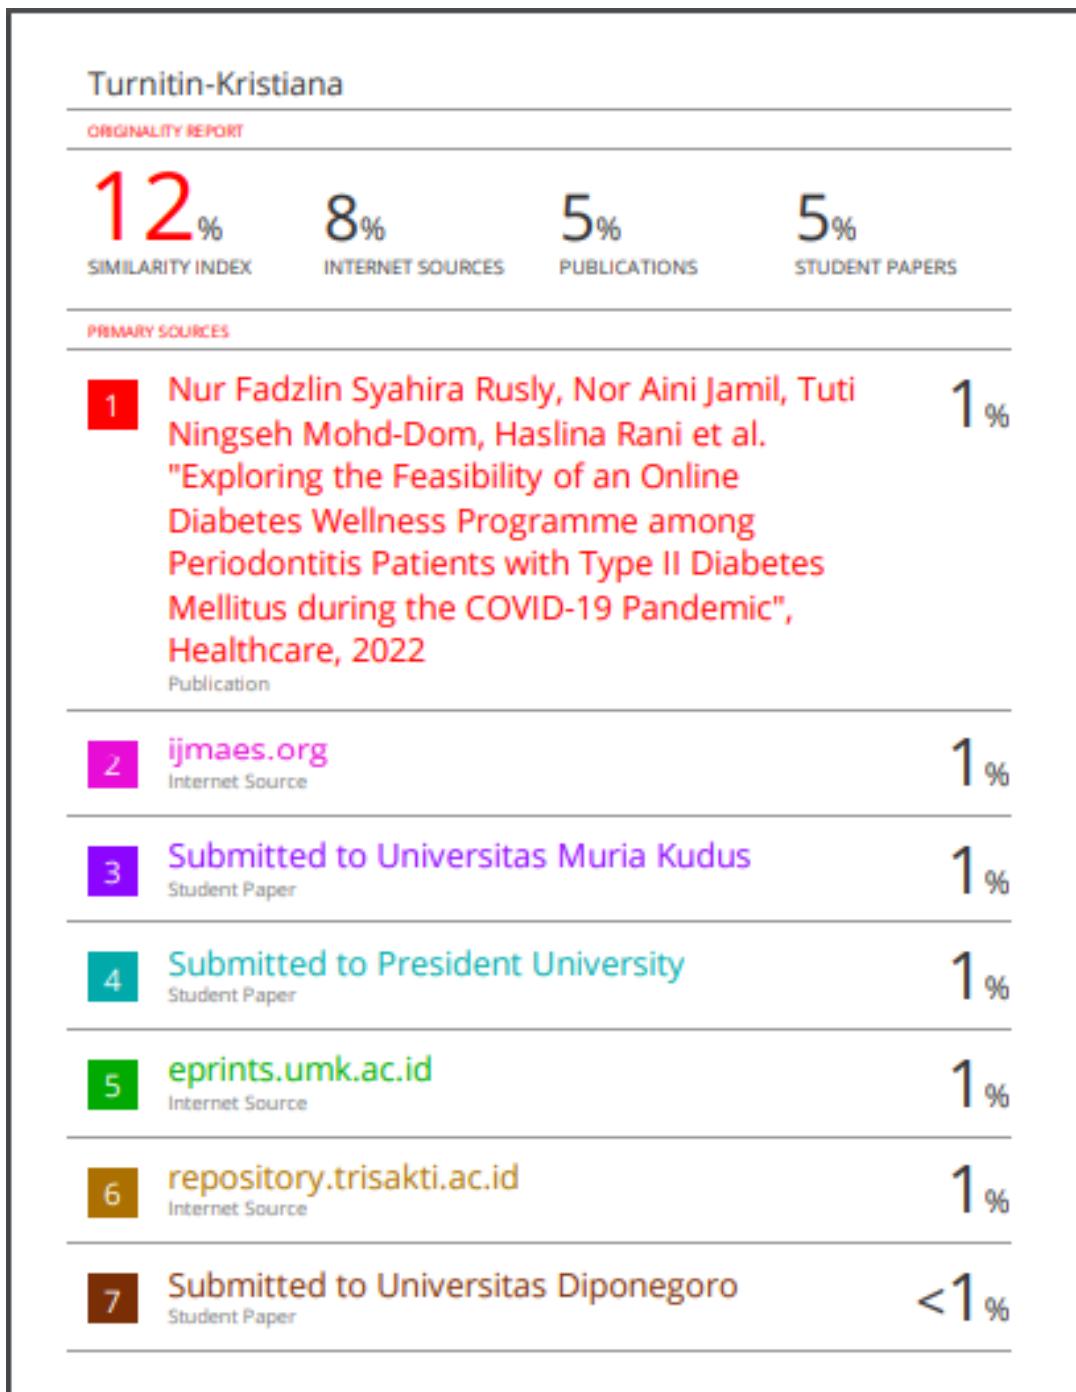

1. My beloved parents and family, for always supporting me through all that I have gone through to pursue my education and finish my thesis.
2. Dr. Ir. B.M.A.S Anaconda Bangkara, M.T., M.S.M, my thesis advisor that had given great guidance, motivation, and support to finish the thesis by giving advice, comments, and corrections that also makes me get a chance to learn many new things and inspire me to keep learning in many ways.
3. My sincere gratitude towards the examiner panel, Prof. Dr. Jony Oktavian Haryanto, and Dr. Anton Wachidin Widjaja, S.E., M.M., for valuable advice, corrections, and suggestions for my thesis.
4. Billy Sofjan, for all of your support and encouragement throughout this experience.
5. All respondents who have contributed to the collection of relevant information used in this research.
6. All of my Management of Technology lecturers, fellow students, and staff, thank you for all of the lessons, cooperation, and cheers during the learning process.

## **ABSTRACT**

The purpose of this study is to find out the correlation between knowledge and perception of a healthy lifestyle with perceptions of adopting a healthy lifestyle during the covid-19 pandemic in the people Jababeka area, Cikarang, and to find out the most dominant variable contributing to public perception of adopting a healthy lifestyle during the covid-19 pandemic in the Jababeka area. The method used in this study is quantitative research, distributed the mixed offline and online questionnaires to 307 people in the age range of 20-49 years old. The population in this study involved 307 respondents which were categorized as employees with the non-probability sampling technique. The data was analyzed using SEM AMOS 20. The results of this study found people's attitudes, and the influence of social, and perceived behavioral control impacted low in the intention to adopt a healthy lifestyle during COVID-19 in Jababeka. Meanwhile perceived behavioral control which predicts people's perception of the capability and control of the action shows a direct significant impact on people's decision to adopt a healthy lifestyle behavior.

**Keywords:** healthy lifestyle, covid-19, behavior, intention.
