### Stats

Average Perplexity Score: 118.656

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 99.130

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "*related to the alleged corruption case in the procurement of social assistance (bansos) handling Covid-19.*", has a perplexity of: 427

## **ABSTRACT**

The issue of waste management is still an important problem in Indonesia. In particular, inCibeber, North Cikarang the issue of waste is highly associated with the socio-economic conditions where most of the residents in the village are industrial workers with a tight schedule and no time to manage waste while the people also have a lack of waste management initiatives as people are still accustomed to littering in rivers and also burning garbage which causes air pollution. Therefore, in line with the sustainable development concept, this project focused on waste management training. The project was conducted from July to August 2022 and the implementation was divided into several stages such as preparation, implementation, participant response, and feedback stages. Target participants are people of Cibeber Village from 15 to 30 years old. The training is also into two sessions which are recycling paper waste and making compost fertilizer training. As a result, the evaluation showed that 90% of participants understood the process of recycling paper waste into useful goods and 80% of participants understood the materials and tools needed as well as the stages of making compost fertilizer.

## Table List

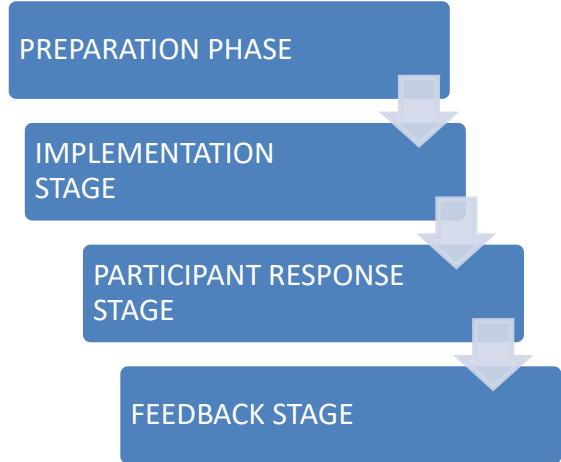

No	Variables	Result
1	understanding the recycling paper waste into a useful goods process	90% participant understood
2	understanding the materials and tools needed as well as the stages and workings of making compost fertilizer	80% participant understood

No	Question	Of	No
1.	Have you ever received training on good and correct waste management?		
2.	Do you know the types of organic and non-organic waste?		
3.	Do you know how to manage waste that has requirements?		
4.	Do you know the types of waste that are in your surroundings?		
5.	Do you know how to sort and select organic and non-organic waste in your surroundings?		
6.	Do you think it is necessary to sort organic waste?		

	Question	Of	No
1.	Do you understand the purpose of recycling paper waste into new paper?		
2.	Do you understand the steps for recycling waste paper into new paper?		
3.	Do you understand the tools and materials used in recycling paper waste into new paper?		
4.	Do you understand the benefits of recycling activities for environmental cleanliness?		

<b>No</b>	<b>Question</b>	<b>Of</b>	<b>No</b>
1.	Do you understand the purpose of the compost filter recycling activity?		
2.	Do you understand the steps for compost filter recycling activities?		
3.	Do you understand the tools and materials used in recycling waste paper into new paper?		
4.	Do you understand the benefits of recycling activities for environmental cleanliness?		

Picture list

## Cara MUDAH membuat PUPUK ORGANIK CAIR

**1** 2/3 bagian diisi kolon domba/kambing

**2** Tabur 3-5 butir ragi tape yang sudah dikulakan \* kalau ada boleh ditambah starter bioaktivator yang dapat dibeli di pasar

**3** Isi air sampai dengan menutupi 1/3 bagian sisa. Lalu tutup drum/tong agar proses fermentasi berlangsung baik.

**4** Setiap satu hari buka penutup drum sedikit-sedikit selama +/- 5 menit. Pupuk Organik Cair ini siap digunakan setelah 7 hari

**Catatan Tambahan:** Pupuk Organik Cair (POC) ini paling cocok untuk terapan sebagai pupuk tanaman sayuran hortikultura.

**Cara penggunaan:** Campurkan 15 cc POC dengan 1 liter air, berikan dengan cara ditocor sebanyak +/- 1 gelas bekas air bermakan per pohon.

Ampas (padatan) yang tersisa di dalam tong/tahum dapat dimanfaatkan sebagai kompos

Drum/tong skala +/- 100 s.d 120 liter
