ABSTRACT

In the current era, the word for “chatbot” and “game” in the same sentences is common, since now many people have already experienced a lot of chatbot or bot in any platform that is available, for example the social media. People of various ages have already gotten used to the phrase “games bot” and use the services, especially for entertainment. Even though the “games bot” is already common, there are always slight differences between each bot but it won’t close the possibilities for it will have the same features and also the same problems, mostly the limitations.

To make the chatbot more intriguing, which is by making the full-fledged web-based application that uses Telegram as the login choice.

Keywords: game, chatbot, telegram, entertainment
