ABSTRACT

The safety of public restroom users, especially the elderly and individuals with certain health conditions, remains a serious concern due to the lack of a real-time incident monitoring system. Cases of slipping, fainting, or medical emergencies that are not detected in time can be fatal due to delays in assistance. Manual monitoring by officers cannot be done continuously for 24 hours due to limited human resources. Therefore, an automated system is needed that can detect accidents in the restroom and send alerts quickly to relevant parties.

This research aims to design and develop an accident detection system in restrooms using sensor technology integrated with website-based health management. The system is designed to be able to detect events such as falls, fainting, or other emergencies, and provide immediate notification to officers or emergency services. From the user's point of view, especially vulnerable groups such as pregnant women and the elderly, the presence of this system provides a sense of security because they know help will come immediately when needed. With this system in place, it is expected that incident response will be faster, which will significantly improve the safety and comfort of public restroom users.

Keywords: Management System, Fall Sensor Detection.

TABLE OF CONTENTS

ABSTRACT.....	8
DEDICATION.....	2
ACKNOWLEDGMENTS.....	2
CHAPTER 1: PROPOSAL.....	1
1.1. PROBLEM FORMULATION.....	1
1.1.1. Background of the Problem.....	1
1.1.2 Problem Statement.....	4
1.1.3 Objective.....	4
1.1.4 Problem From a Customer Perspective.....	5
1.2. PROBLEM CONSTRAINTS ANALYSIS.....	6
1.2.1. Sensor Limitation.....	6
1.2.2. Privacy Concern.....	6
1.2.3. Maintenance.....	6
1.3. PROBLEM FUNCTIONAL ANALYSIS.....	7
1.3.1. Functionalities 1: Real-Time Accident Detection.....	7
1.3.2. Functionalities 2: Instant Notification System.....	7
1.3.3. Functionalities 3: Integrated With Web-Based Health Management.....	7
1.4. SOLUTION SELECTION.....	8
1.4.1. Alternative Solution 1.....	8
1.4.2. Alternative Solution 2.....	8
1.4.3. Alternative Solution 3.....	9
1.4.4. Solution Selection.....	9
Table 1.1 Solution Selection.....	10
1.5. SOLUTION USAGE SCENARIO.....	11
1.5.1. Scenario for Admin Manage Patient Medical data.....	11
1.5.2. Scenario for Admin Manage Account Patient.....	11
1.5.3. Scenario for Patient View Their Own Medical Records.....	12
1.5.4. Scenario for Patient Need to Used Toilet.....	12
1.5.5. Scenario for System Secutiry.....	13
1.6. DEVELOPMENT EFFORT.....	14

1.6.1. Man-Months.....	14
1.6.2. Machine-Months.....	14
1.6.3. Development tools.....	14
1.6.4. Test Equipment.....	14
1.6.5. Expert Needs.....	15
1.6.6. Cost Estimation.....	15
1.6.7. Timelines.....	15
Table 1.2 Timeline.....	15
1.7. CONCLUSION.....	16
CHAPTER 2: SPECIFICATION.....	18
2.1. EXISTING AND PROPOSED SYSTEM.....	18
2.1.1. Existing Business Process.....	18
Figure 2.1. Business process.....	18

3.2.2. Quantitative Solution Selection.....	68
3.2.3. Solution Selection.....	72
3.3. HIERARCHICAL/ITERATIVE DESIGN.....	74
3.3.1. Data Flow Diagram for Safe Bathroom System.....	74
2. Interface Between Block Diagram.....	83
3. Steps in Software Engineering Design.....	84
4. Detail Components of Library Used.....	86
3.4. VERIFICATION DEMONSTRATION AND PROOF OF DESIGN PROCESS	95
3.5. STANDARDS USED.....	96
3.6. IMPLEMENTATION AND TESTING PLANS.....	99
1. Gantt Chart Developing and Testing Safe Bathroom System.....	99
2. S-Chart Planning during developing and Testing.....	99
CHAPTER 4: IMPLEMENTATION.....	101
4.1. DESIGNS IMPLEMENTATION.....	101
4.1.1. Web Based Health Management (Management patient medical data).....	101
4.1.2. User Interface Implementation.....	131
4.1.3. Integration among every module.....	213
4.1.4. Implementation of Patient Medical Data Encryption.....	232
4.1.5. Implementation Verification of Parts 1,2,3, and 4 explained.....	234
4.2. DATABASE IMPLEMENTATION.....	236

4.2.1. Implementation of the “Medical Records” Table.....	236
4.2.2. Implementation of the “Accident” Table.....	237
4.2.3. Implementation of the “user” Table.....	239
4.2.4. Implementation of the “patient” Table.....	240
4.3. USER INTERFACE IMPLEMENTATION.....	242
4.3.1. User interface of the Patients Side.....	242
4.3.2. User interface of the Admin Side.....	245
5.1. PRODUCT DISPLAY.....	248
5.1.1. Software Product Display.....	248
5.1.2. Hardware Product Display.....	249
The product display on this system focuses only on software, Because my responsibilities focus on the software side.....	249
6.1. COMPONENT COST ANALYSIS.....	250
7.1. MANUAL GUIDE.....	251
7.1.1. System Build Documentation From the Source.....	251
7.1.2. System Installation.....	253
7.1.3. User Guide per Role.....	256
CHAPTER 5: TESTING.....	266
5.1. RESTATE THE PROBLEM AS STATED IN F100 DOCUMENT.....	266
1. Problem Statement.....	267
2. Objective.....	268
3. Problem from a Hospital Stakeholder Perspective.....	269
5.2. RESTATE THE SPECIFICATIONS STATED IN F200 DOCUMENT.....	270
5.2.1. Main Functionality.....	270
5.2.2. User Characteristic.....	270
5.2.3. Constraints.....	271
5.2.4. Product Development Environment.....	273
5.2.5. Product Operational Environment.....	273
5.3. FUNCTIONAL TESTING.....	274
5.3.1. Testing results of every function in the specification.....	274
b. Software Core System Function.....	279
5.3.2. Present Qualitative Testing.....	288
5.3.3. Detail the test procedures that are carried out according to the design.....	291

b. Local Feedback System Test (Piezo Buzzer + OLED Display).....	291
c. SMS Notification Test (SIM800L Module).....	291
d. Web-Based Dashboard Visualization Test.....	292
e. Role-Based Access Control (RBAC) Test.....	292
5.4. TESTING OTHER SPECIFICATIONS:.....	292
5.4.1 Non-functional specifications such as size, weight, etc., that are included in the document (PART C NO. 5 F200).....	292
5.4.2. A photo/recording of the test is shown in the document.....	300
2.1 Initialization.....	301
2.2 Acceleration Display.....	302
2.3 Fall Detection Display in OLED.....	303
2.4 Message Alert Notification.....	305
2.5 Fall Sensor Dashboard.....	307
5.5 CONCLUSION.....	321
