*% detected as AI

AI detection includes the possibility of false positives. Although some text in this submission is likely AI generated, scores below the 20% threshold are not surfaced because they have a higher likelihood of false positives.

Caution: Review required.

It is essential to understand the limitations of AI detection before making decisions about a student's work. We encourage you to learn more about Turnitin's AI detection capabilities before using the tool.

Disclaimer

Our AI writing assessment is designed to help educators identify text that might be prepared by a generative AI tool. Our AI writing assessment may not always be accurate (i.e., our AI models may produce either false positive results or false negative results), so it should not be used as the sole basis for adverse actions against a student. It takes further scrutiny and human judgment in conjunction with an organization's application of its specific academic policies to determine whether any academic misconduct has occurred.

Frequently Asked Questions

How should I interpret Turnitin's AI writing percentage and false positives?

The percentage shown in the AI writing report is the amount of qualifying text within the submission that Turnitin's AI writing detection model determines was either likely AI-generated text from a large-language model or likely AI-generated text that was likely revised using an AI paraphrase tool or word spinner.

False positives (incorrectly flagging human-written text as AI-generated) are a possibility in AI models.

AI detection scores under 20%, which we do not surface in new reports, have a higher likelihood of false positives. To reduce the likelihood of misinterpretation, no score or highlights are attributed and are indicated with an asterisk in the report (*%).

The AI writing percentage should not be the sole basis to determine whether misconduct has occurred. The reviewer/instructor should use the percentage as a means to start a formative conversation with their student and/or use it to examine the submitted assignment in accordance with their school's policies.

What does 'qualifying text' mean?

Our model only processes qualifying text in the form of long-form writing. Long-form writing means individual sentences contained in paragraphs that make up a longer piece of written work, such as an essay, a dissertation, or an article, etc. Qualifying text that has been determined to be likely AI-generated will be highlighted in cyan in the submission, and likely AI-generated and then likely AI-paraphrased will be highlighted purple.

Non-qualifying text, such as bullet points, annotated bibliographies, etc., will not be processed and can create disparity between the submission highlights and the percentage shown.

**DOCUMENTER FILM OF WATER AID PROJECT (BE'E DEBU/

ABSTRACT

“Water Aid,” a registered charity, collaborates with local partners in Africa and Asia on small-scale primary water supply projects, basic sanitation, and hygiene education for impoverished communities in the developing world. Programs are focused on sustainable development rather than emergency relief. Utilization of cost-effective technologies is preferred, particularly those that include established local methods. This, together with the training of local personnel, enhances the likelihood of replication among WaterAid's local operational partners. The methods used thoroughly engage the beneficiary community, since their involvement is crucial for the efficient operation and maintenance of their new supply. Ultimately, it is anticipated that impoverished communities establishing their own safeguarded water supply would generate the confidence to address further developmental requirements.

Keyword: Be'e Debu / Retention Water Pound, documentaryfilm, Communities daily.

ACKNOWLEDGEMENT

With the completion of this final task, I want to convey my appreciation to Almighty God for His blessings and love over the duration of this undertaking. With the strength given by Him I was able to complete this task to the maximum extent until the end. In addition, I like to convey my appreciation to the individuals listed below:

1. I would like to express my deepest gratitude to Mr. Hari Suryanto as my supervisor in this final assignment for his guidance and teachings in guiding me to carry out this assignment. Thank you sir for your patience and guidance so that I can know what I have to do and how to do it well. Also, the praises given by him also brings great enthusiasm within me to continue doing this project as best as possible.
2. I also want to express my gratitude to all the communication lecturers at President University for the dedication and teaching they have given me during my lecture period. The knowledge that has been given has become a provision for me to carry out this assignment.
3. Not to forget, I would like to say a big thank you to Sr. Agostinho Araujo as my mentor when I underwent a one year internship at Ministerio Estatal Timor-Leste. The things that Sr. Agostinho Araujo taught me with great patience became the foundation for me in thinking and making decisions. Thank you Sr. Agostinho Araujo for being a good example for me to become a better and braver person.
4. For my beloved two comrades, Nelson Pinto and Ravi, I am very grateful to have gotten to know and been on this journey with you two. We went through many things together with lots of laughter and tears. Thank you for enduring this process with patience to understand and help each other. The balance in

this team of working and playing together is something I will always be grateful for.
