Program Head of Information Technology

Rila Mandala, Ph.D
Dean of Faculty of Computing

PANEL OF EXAMINER APPROVAL

The Panel of Examiners declare that the undergraduate thesis entitled **MY FINANCE: WEB APPLICATION WITH STOCK PRICE PREDICTION USING REGRESSION LEAST SQUARES ALGORITHM** that was submitted by **EPAFRODITUS GEORGE CLEMENT DJAJA** majoring in **Informatics** from the Faculty of Computer Science was assessed and approved to have passed the Oral Examination on Friday June 9, 2023.

Panel of Examiner

A handwritten signature in blue ink, appearing to read 'Ghofir', with a horizontal line underneath.

ABDUL GHOFIR
Chair of Panel Examiner

A handwritten signature in black ink, appearing to read 'Rosalina', with a large loop at the top and a vertical line ending in a dot.

ROSALINA
Examiner I

STATEMENT OF ORIGINALITY

In my capacity as an active student of President University and as the author of the undergraduate thesis/ final project/ business plan (underline that applies) stated below:

Name : Epafroditus George Clement Djaja

Student ID number : 001202000080

Study Program : Informatics

Faculty : Computing

I hereby declare that my undergraduate thesis/final project/ business plan entitled “*My Finance: Web Application with Stock Price Prediction using Regression Least Squares Algorithm*” is, to the best of my knowledge and belief, an original piece of work based on sound academic principles. If there is any plagiarism, including but not limited to Artificial Intelligence plagiarism, is detected in this undergraduate thesis/final project/ business plan, I am willing to be personally responsible for the consequences of these act of plagiarism, and accept the sanctions against these acts in accordance with the rules and policies of President University.

I also declare that this work, either in whole or in part, has not been submitted to another university to obtain a degree.

**SCIENTIFIC PUBLICATION APPROVAL FOR ACADEMIC
INTEREST**

I, the undersigned, am a member of the President University's academic community:

Name : Epafroditus George Clement Djaja
Student ID : 001202000080
Study Program : Informatics
Faculty : Computer Science

I hereby certify and endorse the grant to President University of a non-exclusive, royalty-free right to use the title of my final report for the advancement of science and technology:
“My Finance: Web Application with Stock Price Prediction using Regression Least Squares Algorithm”

President University is permitted to communicate, convert, manage in a database, maintain, and publish my final report using this non-exclusive royalty-free right. President University requires that I identify myself as the report's copyright owner.

Cikarang, 2023

Epafroditus George Clement Djaja

**ADVISOR APPROVAL FOR JOURNAL/INSTITUTION'S
REPOSITORY**

I, the undersigned, am a member of the President University's academic community:

Name : Ir. Rusdianto Roestam M.Sc., Ph.D

ID number :

Study Program : Informatics

Faculty : Computer Science

declare the following assertion:

Title of thesis : **My Finance: Web Application with Stock Price Prediction
using Regression Least Squares Algorithm**

Thesis author : Epafroditus George Clement Djaja

Student ID : 001202000080

will be unpublished or published in the journal's or institution's repository, respectively.

Stats

Average Perplexity Score: 111.261

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 129.228

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "Cikarang, 2023 Ir.", has a perplexity of: 582

ABSTRACT

This final project focuses on the development of a web application called My Finance, designed for managing personal finances. The application allows users to register and log in using email and password authentication. Once logged in, users have a dashboard displaying essential financial information such as monthly income, spending, balance, and net worth. The application's main feature is the "Pocket" page, where users can create different pockets, including options like Cash, Bank account, and e-wallet. Users can specify the pocket type, name, current balance, and description. Actions such as transferring funds between pockets, editing details, deleting pockets, and reviewing pocket transactions are available. The "Transaction" page enables users to add three types of transactions: income, spending, and transfers. Within the stocks section, a machine learning algorithm is incorporated to predict future stock prices.

To predict stock prices, the algorithm collects historical data from the Yahoo Finance API, converts it to a structured panda's data frame-like format, and extracts the necessary features and target variables. By making predictions on new data, the algorithm provides users with insights into potential stock price fluctuations, indicating potential upsides or downsides. Least Squares Regression is a popular algorithm used for predicting numerical values based on input features. It aims to find the best-fitting line that minimizes the sum

of the squared differences between the predicted values and the actual values in a given dataset.

The web application is developed using the Laravel PHP framework, with a MySQL database and Apache server utilized for storage and hosting purposes. By combining personal finance management features with stock price prediction, the application offers users a powerful tool for making informed financial decisions

DEDICATION

I dedicate this final project to my loving family, whose unwavering support and encouragement have been instrumental in my academic journey. Your belief in my abilities and constant motivation has pushed me to overcome challenges and reach new heights. This achievement is as much yours as it is mine, and I am forever grateful for your love and sacrifices.

I also dedicate this thesis to my esteemed professors and mentors, whose guidance and expertise have shaped my intellectual growth. Your mentorship has not only expanded my knowledge but also inspired me to pursue excellence in my chosen field.

ACKNOWLEDGMENTS

I would like to express my deepest gratitude to the following individuals and organizations for their invaluable support and contributions to the completion of this thesis:

My family and friends, for their unwavering support, understanding, and encouragement. Their love and belief in me kept me motivated during challenging times and inspired me to persevere.

The participants of this study, for their willingness to share their insights and experiences. Their valuable input and cooperation were essential in generating meaningful results.

President University, for granting me access to their resources and facilities. Their cooperation and assistance were crucial in gathering the necessary data and conducting experiments.

I am deeply indebted to all those mentioned above, as well as to anyone who has been inadvertently omitted but has played a significant role in the completion of this thesis. Thank you for your unwavering support, guidance, and belief in my ability
