STATEMENT OF ORIGINALITY

In my capacity as an active student at President University and as the author of the final project stated below:

Name : Novrilia Ramadhina Zubair

Student ID number : 001202000109

Study Program : Informatics

Faculty : Computer Science

I hereby declare that my final project entitled “NYAMMY: WEB APPLICATION FOR GENERATED RECIPES WITH ADJUST RANGE AND SORT BY CALORIE” is to the best of my knowledge and belief, an original piece of work based on sound academic principles. If there is any plagiarism detected in this final project, I am willing to be personally responsible for the consequences of these acts of plagiarism and will accept the sanctions against these acts in accordance with the rules and policies of President University.

I also declare that this work, either in whole or in part, has not been submitted to another university to obtain a degree.

GET RESULTS

Your text is most likely human written

The nature of AI-generated content is changing constantly. As such, these results should not be used to punish students. While we build more robust models for GPTZero, we recommend that educators take these results as one of many pieces in a holistic assessment of student work. See our [FAQ](#) for more information.

GPTZero Model Version: [2023-07-19](#)

Average Perplexity Score: 164.820

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 378.491

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "This term is homepage.", has a perplexity of: 2523

ABSTRACT

In this final project, a system generates recipes based on the ingredients they have equipped with technology that can adjust the calorie range so that they are sorted and sorted ascending by the bubble sort algorithm for generated recipes with the aim of making life easier for users when they are in a state of confusion. what food do you want to cook or eat, but still want to maintain health by paying attention to the number of calories in the food that will be eaten. The existence of the development of this system will provide benefits for users because it has made it easier for something that was originally easy but often makes most people confused, namely the problem of choosing food while still paying attention to health. This project was built using the RAD approach which prioritizes relatively short completion time, this approach is very suitable for this project because the project being built is not a large project and is quite flexible because there is a prototype stage, so developers can redesign at the same time and don't have to back to the initial stage again. The results obtained by using the integrated method are all planned features are achieved properly and on time.

Keyword: *Recipe, Generate, Calorie, Bubble Sort Algorithm, Rapid Application Development.*

DEDICATION

For my beloved family, Indra Alfian Zubair, Pusliawati, and Febrina Zubair.

ACKNOWLEDGEMENT

First of all, the writer would like to say Alhamdulillah Hirobbil Alamin. Thanks to His guidance and blessing, the writer was able to finish this final project well and smoothly. This final project is the author's final project to fulfill one of the requirements to achieve a bachelor's degree in Informatics.

The author is very aware that in the preparation until the final project is completed, many parties have helped, therefore, on this occasion, the author would like to thank the honorable:

1. Mr. Prof. Dr. Chairy as Chancellor of President University.
2. Mr. Ir. Rila Mandala, Ph.D., as Dean of the Faculty of Computer Science at President University.
3. Mrs. Cutifa Safitri, Ph.D., as the Head of the Informatics Study Program at President University.
4. Mrs. Cutifa Safitri, Ph.D., also serves as the supervisor of my final project and has guided and provided input and suggestions to researchers since the beginning of the Final Project until the completion of this Final Project.
5. Mrs. Rosalina and Mr. Rusdianto Roestam who have been willing to test and provide some input to my application at defense.
6. Parents, siblings, and family who always support and encourage me.
7. Also, my friends Raihan, Andre, Hakim, Tissa, Mutia, also in Central Sulawesi and people at my internship, namely Sucofindo, especially the ISB division, who always have helped me, provide input, and enthusiasm.
8. All university academics who have provided knowledge and services to the author while attending lectures.

Finally, the writer hopes that this final project will be useful for fellow students and readers. May Allah SWT. always bestow His taufik and guidance on all of us.
