## STATEMENT OF ORIGINALITY

In my capacity as an active student at President University and as the author of the final project stated below:

Name : Aliviannisa Aulia Shabira

Student ID number : 001202000122

Study Program : Informatics

Faculty : Computer Science

I hereby declare that my final project entitled “**PASSWORD MANAGER WITH USERNAME RECOMMENDATION USING FISHER-YATES SHUFFLE ALGORITHM**” is to the best of my knowledge and belief, an original piece of work based on sound academic principles. If there is any plagiarism detected in this final project, I am willing to be personally responsible for the consequences of these acts of plagiarism and will accept the sanctions against these acts in accordance with the rules and policies of President University.

I also declare that this work, either in whole or in part, has not been submitted to another university to obtain a degree.

Cikarang, 2023

Aliviannisa Aulia Shabira

## **SCIENTIFIC PUBLICATION APPROVAL FOR ACADEMIC INTEREST**

As an academic community member of the President's University, I, the undersigned:

Name : Aliviannisa Aulia Shabira

Student ID number : 001202000122

Study program : Informatics

for the purpose of development of science and technology, certify, and approve to give President University a non-exclusive royalty-free right upon my final report with the title:

**“PASSWORD MANAGER WITH USERNAME RECOMMENDATION USING FISHER-YATES SHUFFLE ALGORITHM”**

With this non-exclusive royalty-free right, President University is entitled to converse, to convert, to manage in a database, to maintain, and to publish my final report. There are to be done with the obligation from President University to mention my name as the copyright owner of my final report.

This statement I made in truth.

Cikarang, 2023

Aliviannisa Aulia Shabira

## **ADVISOR APPROVAL FOR JOURNAL/INSTITUTION'S REPOSITORY**

As an academic community member of the President's University, I, the undersigned:

Name : Rony Juwono

ID number : 201607622

Study program : Informatics

Faculty : Computing

declare that following thesis:

Title of thesis: **PASSWORD MANAGER WITH USERNAME  
RECOMMENDATION USING FISHER-YATES  
SHUFFLE ALGORITHM**

Thesis author : Aliviannisa Aulia Shabira

Student ID number : 001202000122

will be published in **journal / institution's repository / proceeding / unpublished.**

Cikarang, 2023

Ronny Juwono, S. Pd, M. T.

## PANEL OF EXAMINER APPROVAL

The Panel of Examiners declare that the undergraduate thesis entitled **PASSWORD MANAGER WITH USERNAME RECOMMENDATION USING FISHER-YATES SHUFFLE ALGORITHM** that was submitted by **Alviannisa Aulia Shabira** majoring in **Informatics** from the Faculty of Computer Science was assessed and approved to have passed the Oral Examination on Friday October 20, 2023.

These measurements have been normalized on a scale of 1–100 for display on this chart.

**Readability: 46.8**

Sentences with short words and low amount of syllables have high readability scores.

**Percent SAT: 5.5%**

Measures what percentage of words are SAT words, terms from a standardized college admissions exam known for its labyrinthine vocabulary lists.

**Simplicity: 25.6%**

Measures what percentage of words are in the 100 most common words in the English language.

**Perplexity: 150.5**

How familiar a piece of text is to large language models like ChatGPT.

**Burstiness: 26503.9**

Unique score developed by GPTZero in 2022 that correlates to variance in writing. Humans generally vary their writing patterns over time.

**Average Sentence Length: 5.0 words**

Unique score that correlates to variance in writing, where humans generally vary writing patterns.

## **ABSTRACT**

This system saved the user's username and password so that they could easily remember their account on every page. Additionally, it contains a function that can recommend a username by using the fisher-yates shuffle algorithm. There is also a function on the website that allows users to sign in using face recognition. This function is powered by FaceApi.js, which contains the MTCNN algorithm. Users will get the benefits from the existence of this system's development because it has made it easier for users to write down a note of their username and password on a more secure platform. This project was developed using the RAD methodology, which prioritizes finishing work in a relatively short amount of time. This methodology is very well suited for this project since the project being developed is not a very large project and is quite flexible due to the fact that there is a prototype stage. This enables developers to redesign the project at the same time without having to return to the initial stage again. The application of the integrated strategy led to the achievement of all planned features in the allotted amount of time and in the correct manner.

***Keywords:*** Password, Username, Recommendation, Face-Recognition, Fisher-Yates Shuffle Algorithm, MTCNN Algorithm, Rapid Application Development.

## **DEDICATION**

*I would like to dedicate my final project to my Almighty God, my beloved family, my friends,  
my advisor, and all of my lecturers.*

## ACKNOWLEDGEMENT

First of all, I want to say Alhamdulillah Rabbil'alamin, all praise and thanks are for Allah, the lord of all creations. Thanks to his guidance and blessing, I was given the convenience to go through all the ups and downs while working on this final project. This final project report that I have produced was the last thing that was required of me in order to graduate with a Bachelor of Science degree. During the process of creating this final project, I was given a lot of help and encouragement from a variety of people. For this reason, I would like to extend my thanks to the following people:

1. Mr. Ivan Syahridwan and Mrs. Mita Kusumawaty, as my lovely parents who always support me in all fields, particularly in the field of education. Thank you for all your prayers, motivation, and everything you gave to me. I'm so grateful to be your daughter, and I never regret it. You are the best parents I have.
2. Muhammad Hafidz Ramadhan, as my one and only little brother who always be my everything partner. Thank you for becoming a place for me to talk and share every story.
3. Mr. Rony Juwono, as my thesis advisor who gave me guidance, knowledge, support, advice, and motivation during the preparation of my final project.
4. To all my lecturers in the Information Technology Major who taught me knowledge that I didn't know before.
5. Amelia Zhafira Azzahra and Ajeng Kacita Agrien, as my human diary who always accompanying me since 2016 until now, and if it's possible, forever till Jannah. Thank you for always being here beside me through all the ups and downs, with all the laughter and tears, and gave me emotional and physical support during the preparation of my final project.
6. Adya, Syifa, Hasbiya, Virgy, and Tasla, who always made my life full of rainbows and butterflies, gave me happiness and cheer me up whenever I'm on my lowest. Thank you for supporting me to complete my final project.
7. To all my college friends who always accompanied me to study from the first semester to the final semester. Thank you for encouraged and motivated me during college. I cannot stand here without all of your supports.
8. To 5 Seconds of Summer, Calum, Ashton, Luke and Michael, who produced songs that has always accompanied me since 2014 and also encouraged me in working on

my final project. Thank you for boosting up my moods with all the magical 5 albums.

9. Last but not least, I want to thank me. I want to thank me for believing in me. I want to thank me for all doing this hard work. I want to thank me for having no days off. I want to thank me for never quitting. I want to thank me for just being me at all times.

Even though this final project is far from perfect, hopefully it will be useful for students and all the readers.
