Abstract

Data accuracy, real-time computation, and improved decision-making are just a few of the benefits of using a management information system. It facilitates management's ability to plan, supervise, direct, and delegate work to all departments with which it has a relationship or is in coordination. Hotel management systems are one of the many industries where this information system has been put to use. For the purpose of this project, I developed a website-based system to help the Sekar Arum resort that is located in Bali cut down on human mistakes in administration and make it easier to keep track of data for the resort. After this new normal era, the resort saw an influx of visitors that was completely unexpected. Moreover, with the partnership of Sekar Arum Resort and Kurnia Restaurant, there is a substantial demand for people looking for accommodation. As an outcome of this project, with the help and support of the website, the staff of Sekar Arum Resort and Kurnia Village may perform efficiently and effectively during peak tourist season.

Keyword: Information System, Sekar Arum Resort, Kurnia Village Restaurant.

Dedication

I would like to dedicate this final project to my family and friends, who have already helped me finish this project and my undergraduate degree. I'd like to thank Sekar Arum Resort for allowing me to participate on this project. This project, hopefully, will be beneficial to everyone concerned as well as educational objectives in the future.

Acknowledgement

First, I wish to express my very deep praise and gratitude towards the Almighty God, for the blessing for me in completing this final project entitled Development of Resort Management Information System Study case: Sekar Arum Resort. The preparation of this final project can be completed smoothly and on time because the guidance, assistance and encouragement from various parties. Therefore, I would like to take this opportunity to express my deepest gratitude to:

1. Almighty God for all the blessings and revelations in everything I've been through in life, including getting to this point.
2. My parents, sisters, and all of my family for the prayers and support when I worked on this project at home and during my university life, when most of them were at home.
3. Mrs Rosalina, S.Kom., M. Kom my supervisor for this project, is always patient, gives feedback, encourages me, and is really loving with her students.
4. All lectures in President University who already taught me for the past 3.5 years. Mr Genta, Mrs Cindy, Mrs Rosalina, Mr Rikip, and all lecturer that I can’t mention one by one.
5. PT Finansial (Finku) which give me professional work experience to complete my internship requirement, and met new friends Nora and Addil that always encouraging me when I feel demotivated.

6. PUMA COMPUTING is the organization that I joined in university, and I thank all PUMA COMPUTING members who have already given me memorable experiences and improved my soft skills.
7. Classmates in the Information Systems study program batch of 2019, especially Orivan, Jones, Aulia, Adam, and Salman, who accompany me during university life and share struggles and memories together.
8. Bali-Balian family, they are my second family when I’m in Cikarang, never makes me feel alone, even though I'm far from my family.
9. My support system Gv and Rara for always be there for me.
10. President University Marketing Department (Ambassador) that gave me the opportunity and work experience as a Student Ambassador for Bali Region.
