Stats

Average Perplexity Score: 115.333

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 92.489

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "BPJS Ketenagakerjaan stated that there were 221,740 work accidents in 2020 and 234,370 cases in 2021.", has a perplexity of: 455

ABSTRACT

Accidents at work have become the most common issues for companies. In Indonesia, the number of incidents of workplace accidents has climbed by more than 100% during the last 20 years. Most workplace accidents in Indonesia occur in the construction industry. The purpose of this study is to identify the influence of safety management practices, worker safety attitudes, and work fatigue toward work accidents in construction industry. To achieve the purpose, the researcher surveyed 215 construction workers in Jakarta through online survey. This research demonstrated that safety management has a negative and statistically significant effect on workplace accidents. There was a negative and statistically significant correlation between a worker's safety attitude and workplace accidents. Meanwhile, the influence of workers fatigue on work accidents showed a positive and significant result. This study's findings suggest that a reduction in workplace accidents might be achieved by the coordinated use of safety management practice, worker safety attitude, and work fatigue. However, further study is needed across industries to fully understand the impact of these factors on the prevalence of workplace accidents.

Keywords: Safety Management Practice, Work Accident, Workers Safety Attitude, Work Fatigue.

ACKNOWLEDGMENT

First and foremost, I would like to praise and thank God, the Almighty, for countless blessings, knowledge, and opportunities bestowed upon me. Only by His grace I was able to finish and submit this thesis. Furthermore, I would like to thank President University for allowing me to pursue and complete my bachelor's degree. In addition, I would like to express my sincere thanks and appreciation to everyone who has always been there for me through thick and thin, especially to:

1. Myself. Thank you so much for your commitment to finish the last project. Thank you for holding out until the end through the twists and turns of preparing the thesis. You did it, Aniza! You are marvelous!
2. My beloved parents and brother. Thank you for always supporting me in everything and always giving lots of love through this process. No words could express how grateful I am to be born in this family.
3. Sir Liswandi, my thesis advisor. Thank you for answering my questions and patiently helping me from scratch to end. Without your guidance I would not have been able to get to this step.
4. The samikum-underground-gang. Ahda, Genc, Owen, Ica, Will, and Awi. Thank you for being there and sharing many important information about skripsi, graduation, even gossip, and much more. They really create a rainbow in my skies.
5. Trixy, Putri and Sopi. Thank you for being good friends and a place to share in the ups and downs of this university journey.
6. My Bekasi city friends (Fannisa, Fatma, and Adel). Big thanks for listening to all the grumble I have said during the thesis period (actually all my life). You guys really know me and I love the fact that you are able to understand me, even on my bad side.
