ACKNOWLEDGMENTS

Foremost, I would like to express my sincere gratitude to my master project advisor Dr. Purwanto, S.T., MM, for the continuous support of my master project work, for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research and writing of this master project report.

Besides my advisor, I would like to thank the rest of my master project defense committee for their encouragement, insightful comments, and hard questions.

Last but not the least; I would like to thank my family: my parents Lisbon Sirait and Nurbetty Siburian, for giving birth to me in the first place and supporting me spiritually throughout my life.

GPT ZERO CHECK

The screenshot shows the GPTZero web application. On the left is a sidebar with icons for AI Scan, Scan History (which is selected), Projects, Usage Stats, API, Team Settings, and Settings. The main area is titled "Scan History" and shows a table with one row. The columns are File name, Author, Date, Classification, AI Probability, Plagiarism, and Scan Results. The row contains "Thesis Hana Final....", "Human", "1%", and a "RESULTS" button.

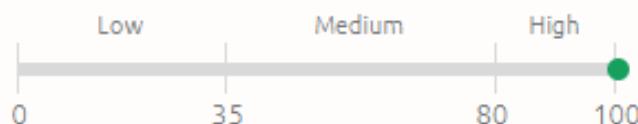

Perplexity: 113.4

How familiar a piece of text is to large language models like ChatGPT.

Burstiness: 216.7

Unique score developed by GPTZero in 2022 that correlates to variance in writing. Humans generally vary their writing patterns over time.

SCIENTIFIC PUBLICATION APPROVAL FOR ACADEMIC INTEREST

As a student of the President University, I, the undersigned:

Name : Hana Septa Debora
Student ID number : 023202205013
Study program : Master of Technology Management

for the purpose of development of science and technology, certify, and approve to give President University a non-exclusive royalty-free right upon my final report with the title:

“DETERMINANTS OF FIRM’S CAPITAL STRUCTURE IN INDONESIA’S CONSTRUCTION INDUSTRY WITH AGE AND FIRM SIZE AS CONTROL VARIABLE”

With this non-exclusive royalty-free right, President University is entitled to converse, to convert, to manage in a database, to maintain, and to publish my final report. There are to be done with the obligation from President University to mention my name as the copyright owner of my final report.

This statement I made in truth.

ABSTRACT

The capital structure of companies holds paramount significance, exerting a profound impact on their financial health. In particular, companies grappling with substantial debt loads may find themselves burdened and constrained. This study endeavors to scrutinize the influence of various factors, including profitability, growth, non-debt tax shield, and asset tangibility, on capital structure. Additionally, this research incorporates firm age and size as control variables to account for potential variations. A purposive sampling method was employed, encompassing a sample of 21 companies within the construction sector, spanning both infrastructure and property, and real estate domains, listed on the Indonesia Stock Exchange during the period from 2013 to 2022. To conduct our analysis, we utilized STATA for both descriptive statistical examination and panel data regression analysis. Our findings reveal that profitability and asset tangibility exhibit a negative correlation with capital structure, suggesting that firms with higher profitability and more tangible assets tend to employ lower leverage. Conversely, growth displays a positive relationship with capital structure, indicating that expanding firms may utilize higher leverage to fund their growth initiatives. Furthermore, our analysis reveals that the impact of non-debt tax shields on capital structure is insignificant. The study also carefully controlled for variations in the debt-to-equity ratio attributable to the age and size of the companies. The outcomes of this research contribute valuable insights to the field of financial management, facilitating a deeper understanding of the determinants of capital structure in the context of construction companies in Indonesia. These findings have the potential to assist practitioners and policymakers in making informed decisions related to capital structure, ultimately aiding in the resolution of contemporary financial challenges.

Keywords: Capital structure, Profitability, Growth, Non-debt tax shield, Asset intangibility, Age and Size firm.

ABSTRAK

Struktur permodalan suatu perusahaan mempunyai arti yang sangat penting karena mempunyai dampak besar terhadap kesehatan keuangannya. Secara khusus, perusahaan yang bergulat dengan beban utang yang besar mungkin merasa terbebani dan terkekang. Studi ini berupaya untuk meneliti pengaruh berbagai faktor, termasuk profitabilitas, pertumbuhan, perlindungan pajak non-utang, dan tangibilitas aset, terhadap struktur modal. Selain itu, penelitian ini juga memasukkan usia dan ukuran perusahaan sebagai variabel kontrol untuk memperhitungkan potensi variasi. Metode yang digunakan adalah purposive sampling, dengan mengambil sampel sebanyak 21 perusahaan di sektor konstruksi, baik di bidang infrastruktur, properti, maupun real estate, yang terdaftar di Bursa Efek Indonesia selama periode 2013 hingga 2022. Untuk melakukan analisis, kami menggunakan STATA untuk pengujian statistik deskriptif dan analisis regresi data panel. Temuan kami menunjukkan bahwa profitabilitas dan wujud aset menunjukkan korelasi negatif dengan struktur modal, menunjukkan bahwa perusahaan dengan profitabilitas lebih tinggi dan aset lebih berwujud cenderung menggunakan leverage yang lebih rendah. Sebaliknya, pertumbuhan menunjukkan hubungan positif dengan struktur modal, yang menunjukkan bahwa perusahaan yang sedang berkembang mungkin memanfaatkan leverage yang lebih tinggi untuk mendanai inisiatif pertumbuhan mereka. Selain itu, analisis kami menunjukkan bahwa dampak perlindungan pajak non-utang terhadap struktur modal tidak signifikan. Studi ini juga secara hati-hati mengontrol variasi rasio utang terhadap ekuitas yang disebabkan oleh usia dan ukuran perusahaan. Hasil penelitian ini memberikan kontribusi wawasan berharga dibidang manajemen keuangan, memfasilitasi pemahaman yang lebih mendalam tentang faktor-faktor penentu struktur modal dalam konteks perusahaan konstruksi di Indonesia. Temuan-temuan ini mempunyai potensi untuk membantu para praktisi dan pembuat kebijakan dalam membuat keputusan yang tepat terkait dengan struktur modal, yang pada akhirnya membantu penyelesaian tantangan keuangan kontemporer.

Kata kunci: Struktur modal, profitabilitas, perkembangan, perlindungan pajak non hutang, keberwujudan aset, usia dan besar perusahaan.
