Abstract

In 2020, the Ministry of Education, Culture, Research and Technology of the Republic of Indonesia (Kemendikbudristek) launched a policy that supports the education system in Indonesia, namely Merdeka Belajar Kampus Merdeka or MBKM, and one of its flagship programs is the Certified Independent Internship and Study program or MSIB. The MSIB program provides an opportunity for students to go directly into the world of work as apprentices for approximately 6 months. The author is one of the students who has the opportunity to take part in this program at one of MSIB's partners, HashMicro, an Enterprise ResourcePlanning (ERP) system provider company, to work as an ERP Consultant. During this program, the author helped to manage the development of two ERP system projects. All job descriptions, stages and results will be described in this document. There are many things that the authors get from this program, one of which is getting the opportunity to apply Information Systems knowledge gained in lectures to the real world of work, such as information systems management, system analysis, system design, and many others.

Key word: *Enterprise Resource Planning* (ERP), Information System, ERP Consultant, System Analyst, Merdeka Belajar Kampus Merdeka (MBKM), Magang dan Studi Independen Bersertifikat (MSIB).
