PHENOMENON OF FATHERLESS ON THE BEHAVIOUR OF FEMALE STUDENTS OF PRESIDENT UNIVERSITY FOR CHOOSING LOVE RELATIONSHIP Irine Widya Maharani 009202000063 This journal article is submitted to complete the by course program of Communication, specifically Media & Society subject at President University ABSTRACT The fatherless phenomenon that occurs among female students of President University.

Fatherless is when the influence and presence of a father is absent in a child's life.

Based on the observations made, the researchers found a phenomenon where fatherless women find it difficult to get along with the opposite sex because they are afraid of being abandoned, so they are afraid to fall in love or start a relationship with the opposite sex.

Stats

Average Perplexity Score: 76.600

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 112.040

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, *"According to Grind"*, has a perplexity of: 679

ABSTRACT

The fatherless phenomenon that occurs among female students of President University. Fatherless is when the influence and presence of a father is absent in a child's life. Based on the observations made, the researchers found a phenomenon where fatherless women find it difficult to get along with the opposite sex because they are afraid of being abandoned, so they are afraid to fall in love or start a relationship with the opposite sex. The purpose of this research is to find out the attitude of this fatherless daughter in having a love relationship. The method used in this study is a qualitative method using secondary data. The findings of this study suggest that the role of the father has an impact on how fatherless women perceive potential life partners. This is evidenced by the cognitive aspect of the study, which found that women who are fatherless due to divorce have a more negative perception of potential spouses who have experienced trauma because of their fear of finding partners who are similar to their fathers. The behavioral aspect of activities when a guy wants to approach tend to be low because they are uncomfortable and irritated, and from the affective aspect of bewilderment and dread in choosing a prospective life mate tend to be high. However, many do not take the time to choose the right candidate for a life partner.
