Stats

Average Perplexity Score: 118.656

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 99.130

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "related to the alleged corruption case in the procurement of social assistance (bansos) handling Covid-19.", has a perplexity of: 427

ABSTRACT

The issue of waste management is still an important problem in Indonesia. In particular, inCibeber, North Cikarang the issue of waste is highly associated with the socio-economic conditions where most of the residents in the village are industrial workers with a tight schedule and no time to manage waste while the people also have a lack of waste management initiatives as people are still accustomed to littering in rivers and also burning garbage which causes air pollution. Therefore, in line with the sustainable development concept, this project focused on waste management training. The project was conducted from July to August 2022 and the implementation was divided into several stages such as preparation, implementation, participant response, and feedback stages. Target participants are people of Cibeber Village from 15 to 30 years old. The training is also into two sessions which are recycling paper waste and making compost fertilizer training. As a result, the evaluation showed that 90% of participants understood the process of recycling paper waste into useful goods and 80% of participants understood the materials and tools needed as well as the stages of making compost fertilizer.
