ABSTRACT

It is very important to raise awareness about how people consume, especially considering the recent waste problem, due to the lack of awareness that waste production habits are one of the causes of climate change which is a serious problem experienced by the entire world's population. Humans cannot be detached from the process of producing waste, but on the other hand, there is still much room for improvement in the way waste is managed. In Indonesia, waste is still not properly disposed of; without any sort of recycling mechanism, it frequently ends up in a landfill. Overfilling dumps happened and is a factor in environmental contamination, which has an impact on human health.

With rising trash production, a Zero Waste lifestyle, and the scarcity of landfill space, as well as the fact that the problem of climate change is becoming more and more serious every day, Trash to Treasure a project that includes increasing awareness of high waste production, a Zero Waste lifestyle, and inspirations for citizens to produce waste into something that is useful and valuable in order to contribute to the SDG's number 12. Which “responsible consumption and production”, also target number 4.7 to “ensure that all learners acquire the knowledge and skills needed to promote sustainable development”. The outcome of this project is that it has been successful in raising awareness of the zero waste lifestyle, and it has also been successful in inspiring housewives to recycle domestic waste into new products in an easy manner.

ABSTRAK

Sangat penting untuk meningkatkan kesadaran tentang bagaimana orang mengkonsumsi, terutama mengingat masalah sampah baru-baru ini, akibat dari minimnya kesadaran akan kebiasaan produksi sampah menjadi salah satu dari sebab terjadinya perubahan iklim yang merupakan masalah serius yang dialami oleh seluruh penduduk dunia. Manusia tidak bisa dilepaskan dari proses menghasilkan sampah, namun di sisi lain masih banyak ruang untuk perbaikan dalam cara pengelolaan sampah. Di Indonesia, sampah masih belum dibuang dengan benar; tanpa mekanisme daur ulang apa pun, sering berakhir di tempat pembuangan sampah.

Timbunan yang meluap-luap terjadi dan menjadi faktor pencemaran lingkungan yang berdampak pada kesehatan manusia.

Dengan adanya permasalahan climate change yang semakin hari semakin serius, penumpukan sampah yang menyebabkan sebagian besarnya berasal dari limbah rumah tangga, dan kekurangan lahan untuk tempat pembuangan akhir, Trash to Treasure hadir untuk meningkatkan kesadaran akan produksi sampah yang tinggi, gaya hidup Zero Waste, dan inspirasi bagi warga untuk menghasilkan sampah menjadi sesuatu yang berguna dan bernilai guna berkontribusi pada Tujuan Pembangunan Berkelanjutan nomor 12. Yaitu “konsumsi dan produksi yang bertanggung jawab”, juga menargetkan nomor 4.7 untuk “memastikan bahwa semua pelajar memperoleh pengetahuan dan keterampilan yang diperlukan untuk mempromosikan pembangunan berkelanjutan”. Hasil dari project ini adalah, keberhasilan dalam spreading awareness terhadap zero waste lifestyle, project Trash to Treasure juga berhasil menjadi inspirasi bagi para household wives dalam pengolahan limbah rumah tangga menjadi suatu produk baru dengan cara yang sederhana.
